

1. Generate the calendar using javascript code by getting the year from the user

Program

```
05.RegistrationForm.html  calendar.html  regform.html  currentbill.php  currentbill.html
1  <html>
2  <head>
3
4  <script>
5  function genCalendar()
6  {
7      var year=prompt('Please enter your year');
8      if (year==null)
9          year=2021;
10     var month=prompt('Please enter your month');
11     if (month==null)
12         month=0;
13     var days=(new Date(year,month,0)).getDate();
14     //alert("Number of Days-"+days);
15     var wdays=(new Date(year,month-1,1)).getDay();
16     //alert("Number of Days-"+wdays);
17     document.body.innerHTML='';
18     document.write("<center>");
19     document.write("<h1>CALENDER (" +year+" -"+month+"</h1>");
20     document.write("<table width = '400px' border='1' align='center'>");
21     document.write("<thead>");
22     document.write("<tr bgcolor=' red' align='center'>");
23     document.write("<td width='50px'>Sun</td>");
24     document.write("<td width='50px'>Mon</td>");
25     document.write("<td width='50px'>Tue</td>");
26     document.write("<td width='50px'>Wed</td>");
27     document.write("<td width='50px'>Thu</td>");
28     document.write("<td width='50px'>Fri</td>");
29     document.write("<td width='50px'>Sat</td>");
30     document.write("</tr>");
31     document.write("</thead>");
32     var i;
33     document.write("<tr align='center'>");
34     for(i=0;i<wdays;i++)
35     {
36         document.write("<td width='50px'></td>");
37     }
38     var d;
39     for(d=1;d<=days;d++)
40     {
41         document.write("<td width='50px'>"+d+"</td>");
42         if(i==6)
43         {
44             document.write("</tr>");
45             document.write("<tr align='center'>");
46             i=0;
47         }
48         else
49         {
50             i=i+1;
51         }
52     }
53     for(;i<7;i++)
54     {
55         document.write("<td width='50px'></td>");
56     }
57
58     document.write("</tr></table><br>");
59     document.write("<button onclick='genCalendar()'> Read year and month </button>");
60     document.write("</center>");
61 }
62
63 </script>
64 </head>
65 <body>
66 <center>
67 <button onclick="genCalendar()"> Read year and month </button>
68 </center>
69 </body>
70 </html>
```

Output

CALENDER (2021 -7)

Sun	Mon	Tue	Wed	Thu	Fri	Sat
				1	2	3
4	5	6	7	8	9	10
11	12	13	14	15	16	17
18	19	20	21	22	23	24
25	26	27	28	29	30	31

[Read year and month](#)

Program

```

1 <html>
